# Natural Disasters

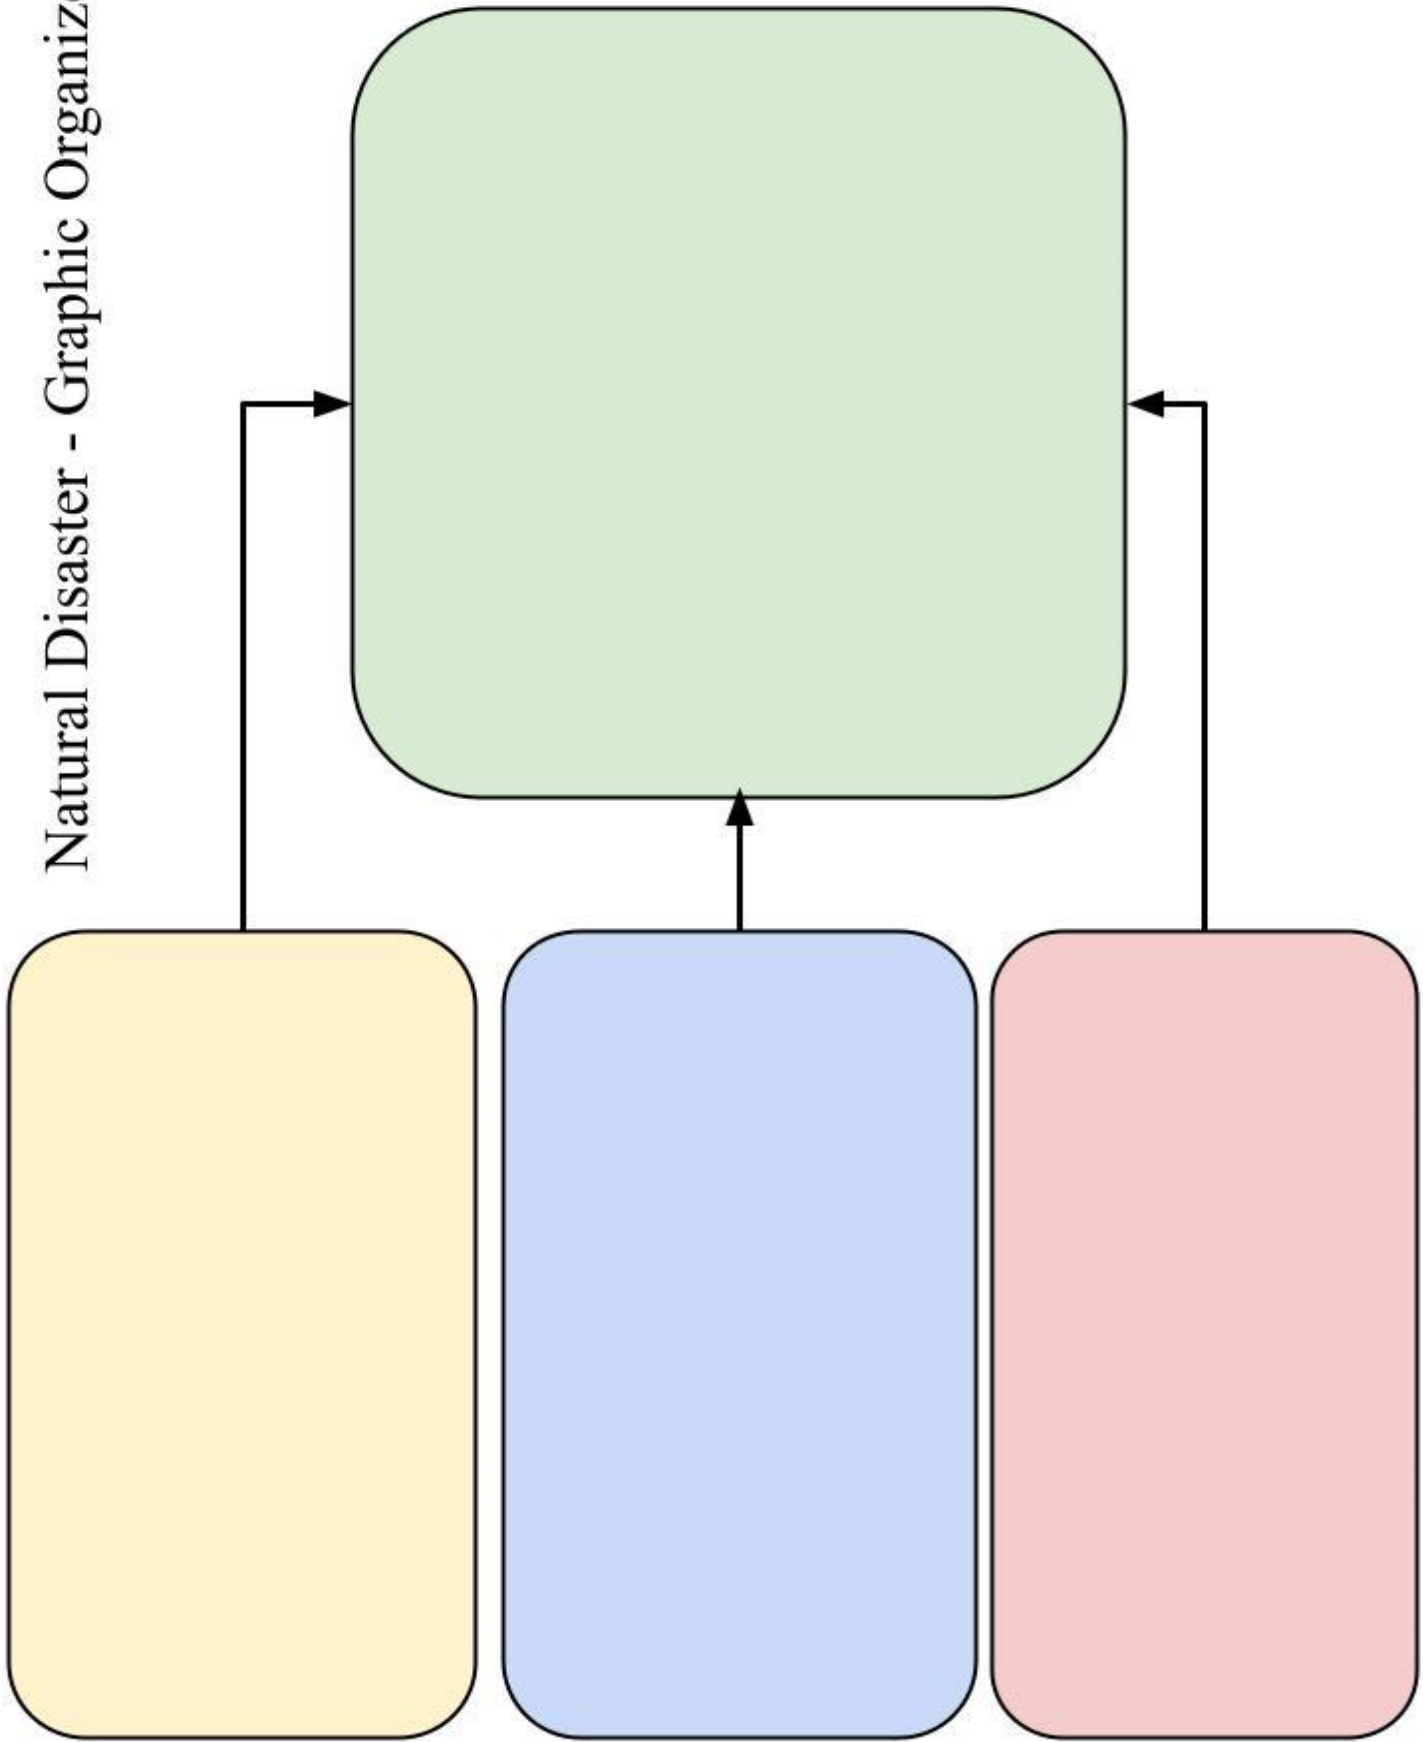

## Landslide

Use the Natural Disaster Graphic Organizer to:

- 1) In the cause section, (*left side of organizer*) research the three different factors that contribute to the creation of the assigned natural disaster.
- 2) In the effect section, (*right side of organizer*) please select one of the landslide types shown above and describe what happens during that type of landslide. Then describe the impact that the 2017 Mocoa landslide in Colombia had on the region including when it happened, where it happened, along with the number of fatalities and the cost of damages.

Natural Disaster - Graphic Organizer

**Renewable Resource** - Select a paper product and explain the step by step process along with the resources and energy used to create, package, distribute, sell, collect and recycle the product into an alternative product that can be used.
